

Step 1: Create a New Project from a ZIP File

1. Go to <https://overleaf.com> and sign up with the college's account.

2. After logging in, Click on "New Project" → "Upload Project".

- Download and Upload the .zip file from the weekly content drive, weeklycontent ->Final Assessment -> Latex IEEE Template- -> Big Data Ana.....practices.zip.

Step 2: Understanding the Project Structure

1. Left Sidebar (Project Files) - Manages all files in your project.

- main.tex**: Usually the main file to compile.
- .cls or .sty files**: These define the document class and formatting.

- **bib files:** Contain bibliographic references.
- **Folders like figures/ or images/:** Typically hold images or charts.

2. Center Panel (Code Editor) - Write and edit your LaTeX source code.

3. Right Panel (PDF Preview) - Shows a live preview of your compiled document.

- Automatically updates when you press the **Recompile** button.
- Shows formatting, figures, tables, citations, etc.

How to Insert Tables in LaTeX

Use the `table` and `tabular` environments.

```

99+ \begin{table}[h!]
100   \centering
101   \caption{\acrshort{ann} Model Evaluation for Test Data}
102   \vspace*{5mm}
103   \label{table:tab2}
104+ \begin{tabular}{ccccc}\hline
105     \textbf{Inputs Layer} & \textbf{Accuracy} & \textbf{Precision} & \textbf{Recall} & \textbf{F1 Score} \\ \hline
106     One Hot Encoding & 0.9975 & 0.9990 & 0.9960 & 0.9975 \\
107     Entity Embedding & 0.9961 & 0.9980 & 0.9939 & 0.9960 \\
108     Entity Embedding with PCA & \textbf{0.9980} & \textbf{0.9990} & \textbf{0.9970} & \textbf{0.9980} \\ \hline
109   \end{tabular}
110 \end{table}

```

current synthesis. Identify applicable funding agency here. If none, delete this.

V. CONCLUSION Highlight the overview of your work

TABLE I
ANN MODEL EVALUATION FOR TEST DATA

Inputs Layer	Accuracy	Precision	Recall	F1 Score
One Hot Encoding	0.9975	0.9990	0.9960	0.9975
Entity Embedding	0.9961	0.9980	0.9939	0.9960
Entity Embedding with PCA	0.9980	0.9990	0.9970	0.9980

REFERENCES

- `\begin{table}[h!]` – Starts the floating table environment; `[h!]` suggests placing it *here*.
- `\centering` – Aligns the table at the center of the page.
- `\caption{}` – Adds a title above the table.
- `\label{}` – Assigns a reference label for use with `\ref{}`.
- `\begin{tabular}{ccccc}` – Begins a 5-column table with all columns centered.
- `\textbf{}` – Makes text bold (commonly used in headers).
- `&` – Separates cells in a row.
- `\\` – Ends the current row.
- `\hline` – Adds a horizontal line.
- `\end{tabular}` – Ends the tabular layout.
- `\end{table}` – Ends the table environment.

How to Insert Images in LaTeX

With a given `program.png` and `text` one process each block phase in details. From Fig. `\ref{fig:methodoclogy}`

```

\begin{figure}[htbp]
\centerline{\includegraphics[Assets/Methodology.png]}
\caption{System Architecture Example}
\label{fig:methodoclogy}
\end{figure}
\section{Result and Discussion}
Should cover the experimental setup, discussion of the findings, and analysis of the findings with the below mentioned subtitle:
\subsection{Read In and Explore the Data}

```

needs to explain as a system aspects, with statistical information and pictorial view. (1 Paragraph) * Aim/objective of the work: (1 Paragraph) * Contributions of the work connected with Methodology (should be itemised) * Organization of the Report (1 Paragraph)

II. RELATED WORK

This section discussed about the existing relevant works. You can discuss this section based on the category of the existing work and the final paragraph you should mention how your work differ with the existing works.

$$O_j = \sigma(b + \sum_{i=1}^m W_{ij} x_i) \quad (1)$$

Please number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3]—do not use “Ref. [3]”

Fig. 1. System Architecture Example

- `\begin{figure}[htbp]` – Starts a floating figure environment; suggests placing the figure **here, top, bottom, or on a separate page**.
- `\centerline{\includegraphics{Assets/Methodology.png}}` – **Centers and displays** the image located at the given path.
- `\caption{System Architecture Example}` – Adds a **caption** under the image.
- `\label{fig:methodology}` – Assigns a **label** for referencing the figure (e.g., `\ref{fig:methodology}`).
- `\end{figure}` – Ends the figure environment.

To reference the figure in your text, use:

As shown in Fig.~\ref{fig:methodology}...

How to Insert Equations in LaTeX

```
64 \begin{equation}
65 O_j = \sigma(b + \sum_{i=1}^m W_{ij} \cdot x_i) \quad \backslash label{eq:ann}
66 \end{equation}
```

$$O_j = \sigma(b + \sum_{i=1}^m W_{ij} \cdot x_i) \quad (1)$$

Please number citations consecutively within brackets [1] The

How to add References in LaTeX

The screenshot shows a LaTeX editor with a file explorer on the left containing 'Assets', 'IEEEtran.cls', and 'Main.tex'. The main editor displays a LaTeX document with a bibliography section starting at line 112. The bibliography lists several references, including works by G. Eason, B. Noble, and I. N. Sneddon (1955), J. Clerk Maxwell (1892), I. S. Jacobs and C. P. Bean (1963), K. Elissa (unpublished), R. Nicole (unpublished), Y. Yorozu, M. Hirano, K. Oka, and Y. Tagawa (1987), and M. Young (1989). The document ends with `\end{document}` at line 126.

On the right side of the editor, there is a table titled 'TABLE I ANN MODEL EVALUATION FOR TEST DATA'. The table has five columns: 'Inputs Layer', 'Accuracy', 'Precision', 'Recall', and 'F1 Score'. It compares four models: 'One Hot Encoding', 'Entity Embedding', 'Entity Embedding with PCA', and 'Entity Embedding with PCA' (repeated). The 'Entity Embedding with PCA' model shows the highest performance across all metrics.

Inputs Layer	Accuracy	Precision	Recall	F1 Score
One Hot Encoding	0.9975	0.9960	0.9961	0.9965
Entity Embedding	0.9961	0.9980	0.9939	0.9960
Entity Embedding with PCA	0.9980	0.9990	0.9970	0.9980

Below the table, there is a 'REFERENCES' section listing the same references as the bibliography in the main document.

Above is the example of referencing in LaTeX, lets breakdown the first reference:

`\bibitem{b1}` G. Eason, B. Noble, and I. N. Sneddon, 'On certain integrals of Lipschitz-Hankel type involving products of Bessel functions,' Phil. Trans. Roy. Soc. London, vol. A247, pp. 529--551, April 1955.

This citation refers to a paper by G. Eason, B. Noble, and I. N. Sneddon, titled "On certain integrals of Lipschitz-Hankel type involving products of Bessel functions," published in *Philosophical Transactions of the Royal Society of London*, volume A247, pages 529–551, in April 1955. The paper discusses integrals involving Bessel functions of a specific type.

How to cite?

```
65 \begin{equation} O_j = \sigma(b + \sum_{i=1}^m W_{ij} \cdot x_i) \end{equation}
66 \end{equation}
67 Please number citations consecutively within brackets \cite{b1}. The
68 sentence punctuation follows the bracket \cite{b2}. Refer simply to the
69 reference
70 number, as in \cite{b3}---do not use "Ref. \cite{b3}" or "reference
\cite{b3}" except at
the beginning of a sentence: "Reference \cite{b3} was the first $\dots$"
```

$$O_j = \sigma(b + \sum_{i=1}^m W_{ij} \cdot x_i) \quad (1)$$

Please number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3]—do not use “Ref. [3]” or “reference [3]” except at the beginning of a sentence: “Reference [3] was the first ...”

using \cite{b1}. The citation will follow \begin{thebibliography}{00} to cite references.
